AMS Technologies Expands its Technology Center in Kraków and Strengthens European Collaboration

Planegg, December 9, 2025. AMS Technologies, leading solution provider and distributor of optical technologies, thermal management, and power electronics, expands its technology center for thermal management solutions and electronics as well as advanced manufacturing services in Kraków, Poland. This strategic investment is key for the company's commitment to delivering high-performance, customized solutions made in Europe – for Europe.

The new facility brings together engineering and production under one roof, fostering interdisciplinary collaboration and accelerating the development of tailored technologies for applications in medical and aesthetics, analytics, and defense. Located near the airport, the site offers excellent infrastructure and an inspiring working environment.

At the heart of the new technology center is the development and production of customized thermal management solutions and electronics, alongside advanced contract manufacturing services for electronics, optomechanics, and thermal systems. By integrating these capabilities, AMS Technologies is strengthening its position as a preferred partner in European high-mix low-volume markets, offering flexible, high-quality solutions that meet the evolving needs of its customers.

“Our new technology center reflects our long-term commitment to innovation, regional growth, and European industrial cooperation,” said Jan Meise, CEO of AMS Technologies. “It enables us to work more closely across disciplines and deliver precisely engineered solutions that help our customers throughout Europe build better products.”

With this expansion, AMS Technologies continues to invest in innovation, sustainability, and international partnerships that drive progress and competitiveness in the European market.

More about AMS Technologies:

AMS Technologies, a team of around 100 innovative minds, is a one-stop shop with combined expertise in optical technologies, thermal management, and power electronics. With a wide network of qualified suppliers and our own capacities for engineering, testing, and production, we help our clients solve their technical challenges.

We believe the best solution for our clients always comes first. Our headquarter is in Martinsried near Munich, Germany, our Engineering and Production sites are in Hanover, Germany, Krakow in Poland, and the United Kingdom. With local sales offices in Germany, the United Kingdom, France, Italy, Spain and Sweden, we are close to our clients.

Over 40 years of experience has enabled us to cater to the needs of more than 2000 European clients from a wide range of high-tech sectors, such as medical technologies, renewable energies, aviation and defense, research and development, and many other industrial applications.

We support universities, spin-offs, and start-ups in their journey to become technology leaders of tomorrow – and we are proudly working with many of the most successful and influential European corporations.
